Contract-scoped certification

Evidence is valid only inside its declared contract

I SG numerical risk

≈30k randomized audits; anytime UCB ≤ 0.48%

SCOPE SG singleton authority only

× NO TRANSFER

II Authority invariance

Frozen FP32 preflight: repeat + singleton checks

SCOPE contract and platform specific

× NO TRANSFER

III Transaction integrity

Certificate, parent version, and frontier checks

SCOPE 800 Qwen + 1,048 Whisper commits

× NO TRANSFER

IV Semantic quality

Qwen: independent FP16 reference | Whisper: paired WER delta

SCOPE family-specific; never pooled

Risk schedules verification; only a certificate authorizes installation.
